SUMMARY

I'm a dedicated and results-driven Frontend Web Developer with about 4 years of professional experience. Skilled in collaborating effectively with cross-functional teams, including senior developers, to deliver exceptional results. Proficient in Vue.js and CSS frameworks, coupled with extensive expertise in UI/UX design and user psychology. Committed to creating seamless and visually appealing web experiences through a combination of technical proficiency and a deep understanding of user behavior.

EXPERIENCE

Front End Developer

Ropstam Solutions   📅 10/2021 - Present   📍 Islamabad, Pakistan

- **Implemented Vue.js best practices** to ensure seamless functionality of projects across diverse browsers and devices.
- **Crafted responsive UI components** to elevate user experiences, optimizing web pages for superior speed, performance, and scalability.
- **Developed localized websites** to cater to diverse global audiences, alongside creating efficient admin panels for streamlined content and user management.
- **Developed reusable components**, enhancing code maintainability and project efficiency while adhering to SEO principles for improved search engine rankings.
- **Collaborated with backend developers and UI/UX designers** to implement seamless integration of frontend components, ensuring a cohesive and visually appealing user interface.
- **Implemented best practices** in version control, continuous integration, and deployment processes, ensuring a smooth and error-free development lifecycle.
- **Worked with high-profile clients**, including companies within the Fortune 500.

Vue.js Developer

QNAR International   📅 2024 - Present   📍 Remote

- **Developed and Maintained Vue.js Applications:** Designed and implemented responsive, dynamic web applications using Vue.js and Quasar Framework.
- **Implemented Form Validations:** Utilized vee-validate and yup for form validation, ensuring robust and user-friendly forms.
- **State Management:** Managed application state using Vuex and Pinia ORM, optimizing data flow and ensuring data consistency across components.
- **API Integration:** Integrated RESTful APIs to fetch and manage data, enhancing the functionality and interactivity of the applications.
- **Component Development:** Created reusable and modular components using the Composition API, improving development efficiency and code maintainability.
- **Testing and Debugging:** Wrote test cases using Cypress to ensure high-quality code and a seamless user experience, focusing on components like LeadAutoComplete.
- **Internationalization (i18n):** Implemented multi-language support using i18n, ensuring the application caters to a global audience.
- Performance Optimization: Optimized application performance by lazy-loading components, minimizing API calls, and improving load times.
- **User Interface Design:** Worked with designers to translate wireframes and prototypes into high-quality, responsive UI components using Quasar's rich component library.
- **Real-Time Data Handling:** Integrated real-time data updates and notifications using WebSockets, ensuring timely and dynamic content display.
- **Local Storage Management:** Implemented persistent state management, saving data to localStorage to enhance user experience and data availability.

SKILLS

Nuxt.js   Vue.js   Vuex/Pinia   Vuetify

Tailwind Css   Element UI   Bootstrap

Quasar UI   Material UI   Scss/Sass

Javacript   Html/CSS   REST Api

Highcharts/Chart.js   Git/Github   Cypress

jQuery   FullPageJS   Leaflet

PROJECTS

Tagmarshals

Tagmarshals is a Vue.js-based web application designed to streamline golf course operations by providing real-time data and analytics for improved efficiency and user experience.

- **Real-Time Data Visualization:** Integrated real-time data feeds and visualizations to monitor and manage golf course operations effectively.
- **User Management System:** Developed a comprehensive user management system, allowing for different user roles and permissions.
- **API Integration:** Integrated various APIs to pull in essential data from external sources, enriching the user experience.
- **Interactive Dashboards:** Designed interactive dashboards for easy access to key metrics and performance indicators.
- **Responsive Design:** Ensured a seamless experience across all devices with a fully responsive interface.

Jenngo

Jenngo is an innovative web application built with Vue.js, focusing on enhancing customer engagement through interactive features and seamless navigation across multiple platforms.

- **Scalable Architecture:** Built with scalability in mind, allowing for future expansion and feature additions.
- **Interactive User Interface:** Developed a dynamic and engaging UI to boost user interaction.
- **Cross-Platform Compatibility:** Ensured seamless performance across various devices and browsers.
- **API Integration:** Integrated multiple APIs to extend functionality and data access.

Vue.js Developer

Iris Software Inc. · Apprenticeship   📅 2023 - 2024   📍 Remote

· **Boosted user engagement** by 30% by implementing dynamic Vue.js components, resulting in a significant increase in session duration.
· **Cut down the page load time** by 40% for the main product, improving overall user experience and satisfaction.
· **Managed a $150,000 project budget** for the development of a new Vue.js application, overseeing a team of 5 developers.
· **Led the development of 3 major Vue.js projects**, coordinating cross-functional teams and ensuring timely delivery within a 9-month period.
· **Streamlined the development process** by 25% by introducing a component library in Vue.js, improving team efficiency and project scalability.
· **Achieved a 95% customer satisfaction rate** by enhancing front-end features by adopting the latest Vue.js technologies.

EDUCATION

Bachelor's Degree in Software Engineering

Virtual University, Pakistan   📍 Islamabad, Pakistan

STRENGTHS

💡 **Efficient Code Writing**
Able to write clean, efficient code that reduces bugs and increases scalability.

⭐ **Cross-functional Teamwork**
Experience collaborating with cross-functional teams to develop feature development across many software projects

🪄 **Self-starter**
Proven ability to work independently, manage multiple projects simultaneously leading to timely, accurate results

CERTIFICATION

Transformational Leadership, Alison
Delved into Transformational Leadership on Alison, acquiring insights and skills to lead with innovation and inspiration.

Vue - The Complete Guide, Udemy
Mastered Vue.js through Udemy's 'Vue - The Complete Guide' course, gaining comprehensive knowledge and hands-on expertise in front- end development.

Introduction to HTML5 from University, Michigan University
Dove into HTML5 via Michigan University, acquiring key web dev skills.

Karla Properties

Karla Properties is a real estate platform developed with Vue.js, designed to simplify property management and search processes by offering intuitive navigation and comprehensive property listings.

· **Advanced Property Search:** Implemented a sophisticated search engine to filter properties based on user preferences.
· **Interactive Maps:** Integrated interactive maps to provide users with location-based property information.
· **Property Management Tools:** Offered tools for property owners to manage listings, track inquiries, and update information in real-time.
· **API Integration:** Connected with external APIs for real-time updates on property details and market trends.

No More Bills

No More Bills is a financial management platform built using Laravel Blade templates, designed to help users track and reduce expenses with automated bill analysis and personalized budgeting tools.

· **Automated Bill Tracking:** Implemented a system to automatically track and categorize user bills.
· **Expense Analysis:** Provided detailed insights and analytics to help users understand their spending habits.
· **Budgeting Tools:** Developed customizable budgeting tools for users to set and manage their financial goals.
· **Payment Reminders:** Integrated reminders and alerts for upcoming bill payments to avoid late fees.

Medical Eye

Medical Eye is a B2B portal for trading medical equipment, similar to Alibaba. It's built using Laravel Blade templates.

· **Comprehensive** catalog for medical equipment.
· **Advanced** search and filter options.
· **User accounts** with order tracking.
· **Supplier** and buyer management systems.
· **Secure payment** gateway integration.

KEY ACHIEVEMENTS

💎 **2 Times Rising Star at Ropstam Solutions**
Recipient of the Rising Star Award twice at Ropstam Solutions, recognized for exceptional performance and dedication.
